

The

Style Guide

Purpose

Our goal for Chat Cats is to present users an easy to navigate, friendly, social website dedicated to cat lovers.

Chat Cat's purpose is to allow users to share cat-related content in a safe and respectful way.

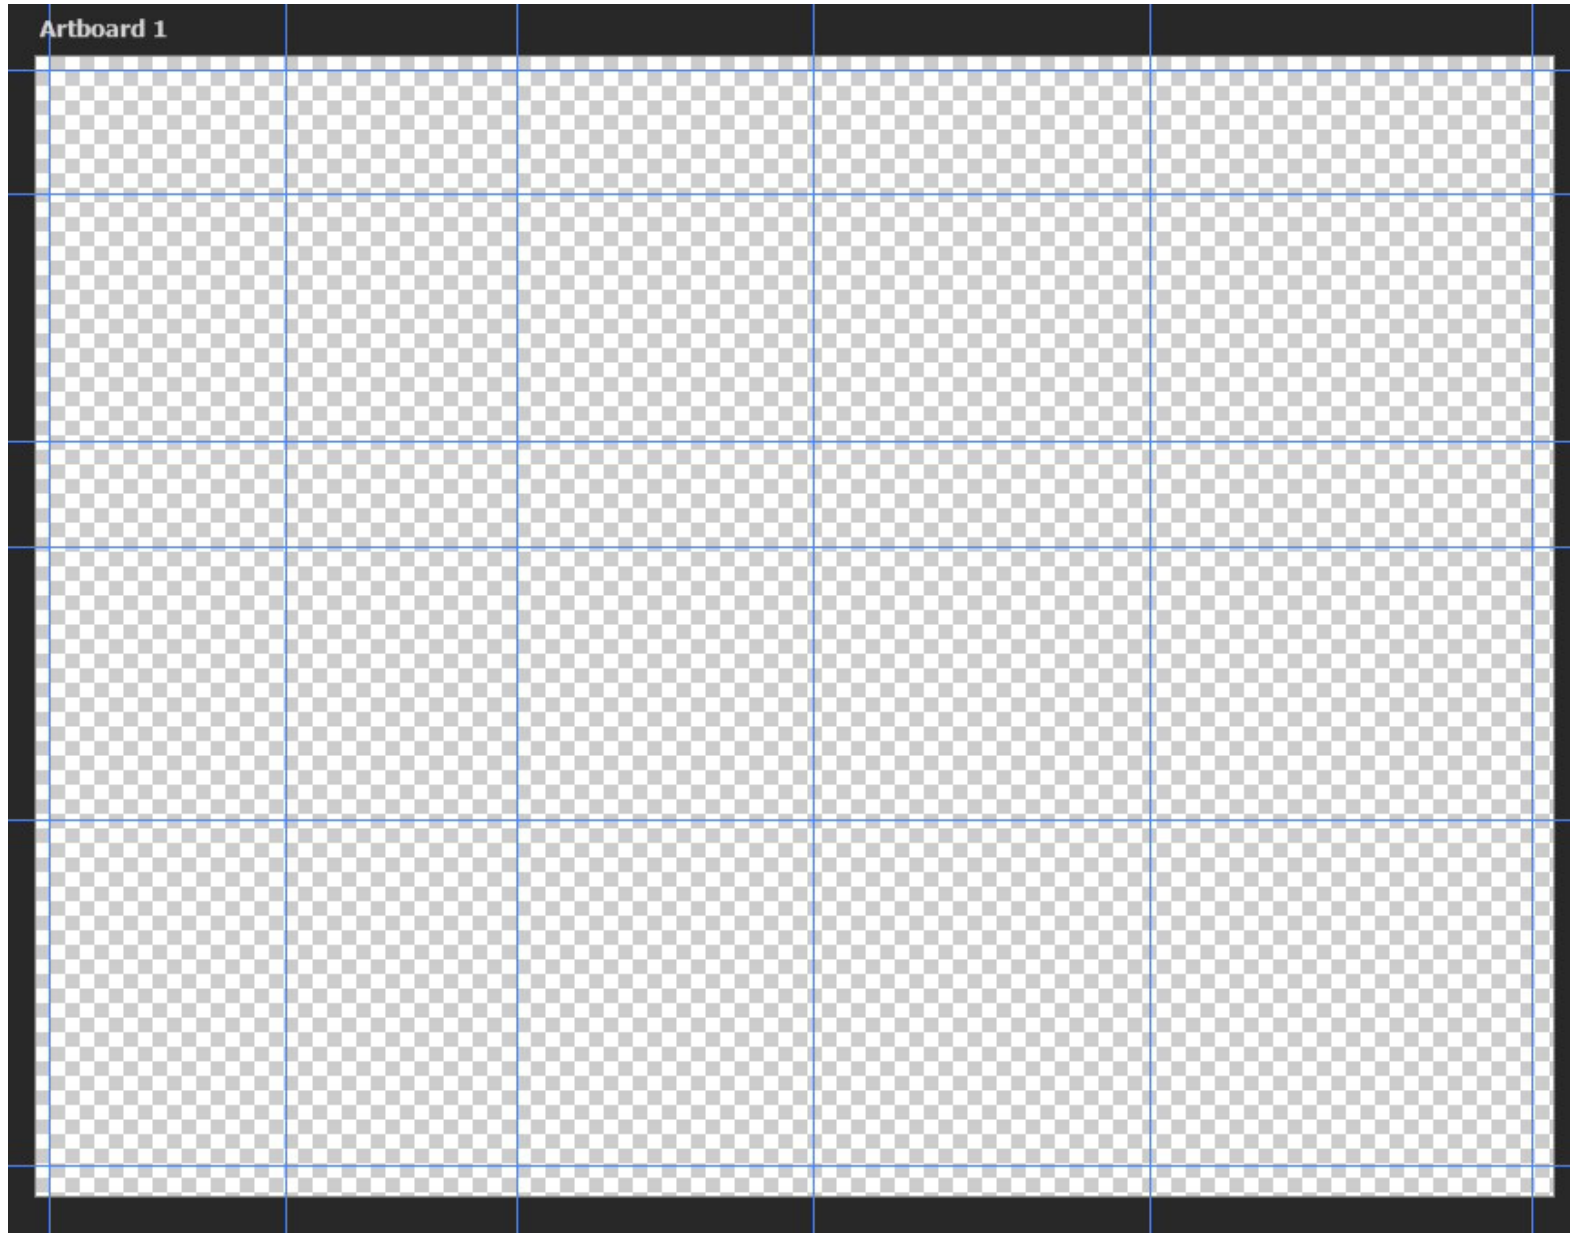

Users have the option to post cat photos, artwork or stories and they also have the ability to just scroll without posting anything.

Auidence

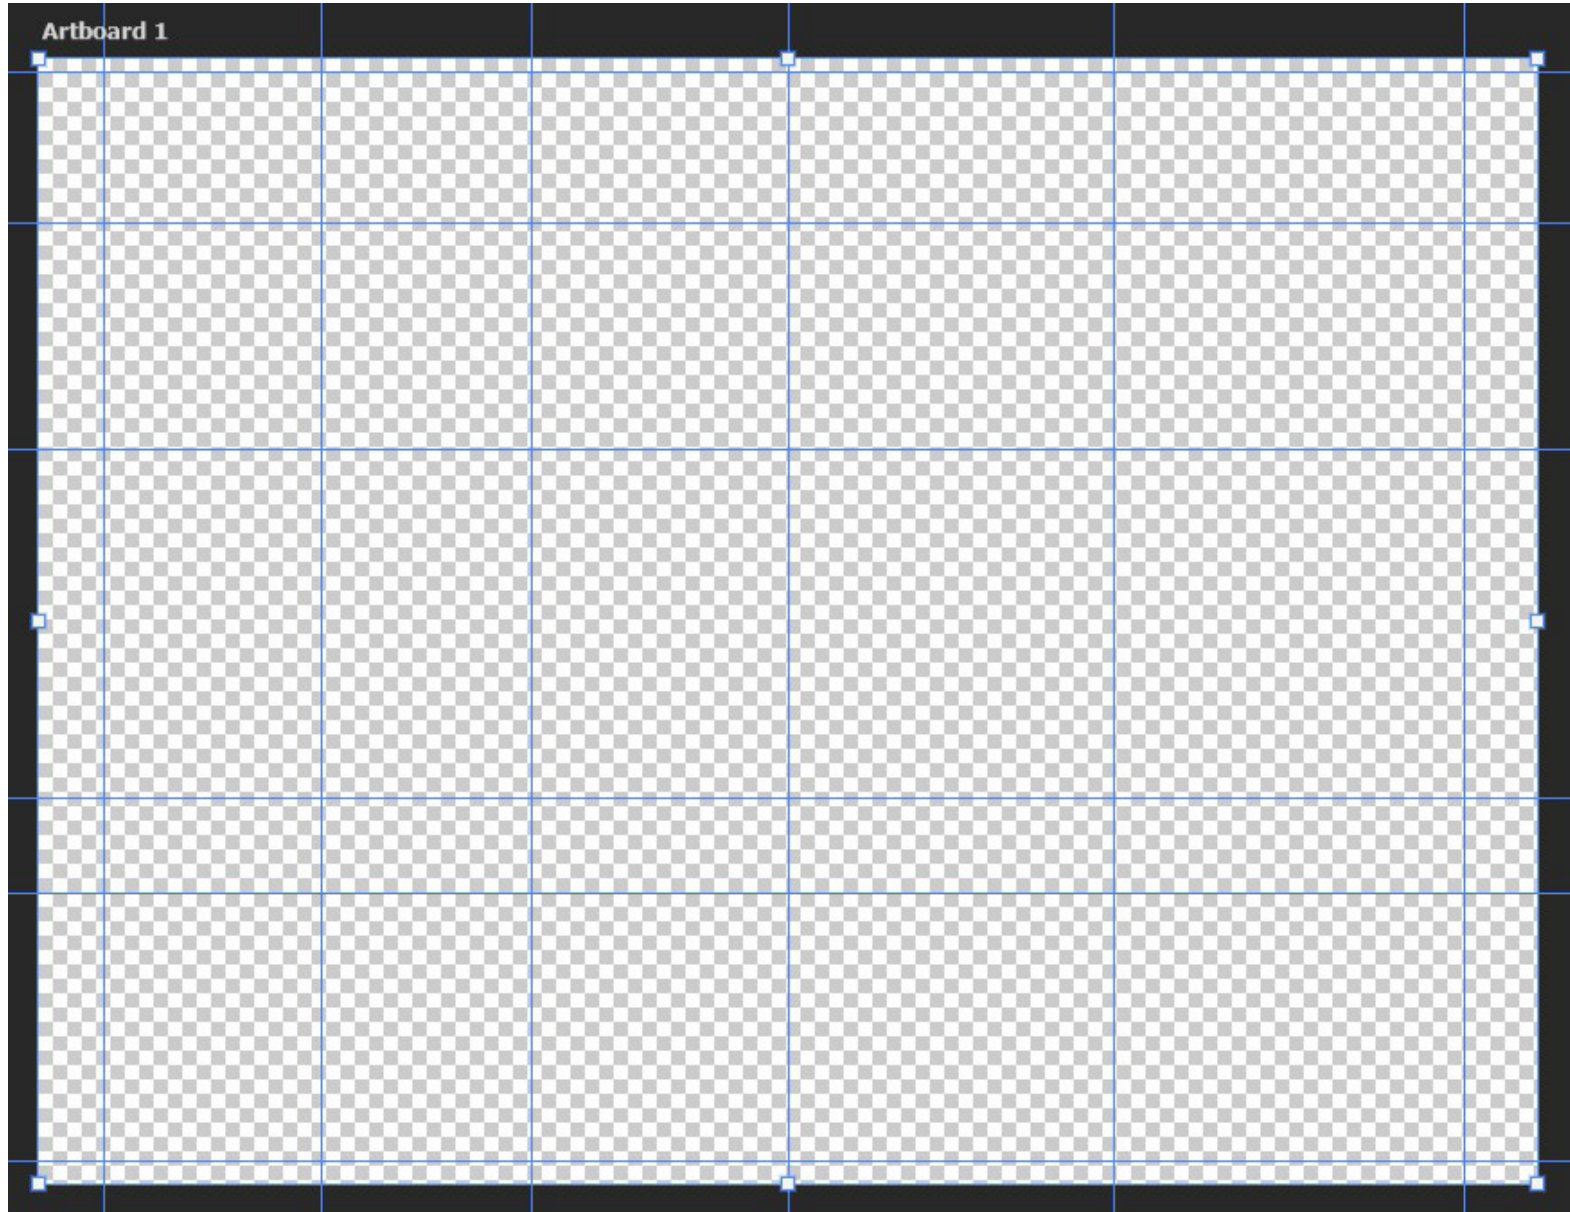

Chat Cats auidence is anyone who loves cats! Our website will never ask for personal information; it is not allowed to post such content. Chat Cats hopes to create a online community where the users feel safe to share their love for cats without exposing any personal information.

Artists, students, teachers, even those retired can find joy in browsing the Chat Cats website.

Chat Cats Color Palette

The orange color is the website's primary color.

The black color is used for the font as well as the logo's color.

The blue color is used to indicate a click option for the user.

The purple color is one of the in website icon colors.

All these colors are used for the in website icon colors.

Typography

Chat Cats primary font is *Font: Segoe Script*

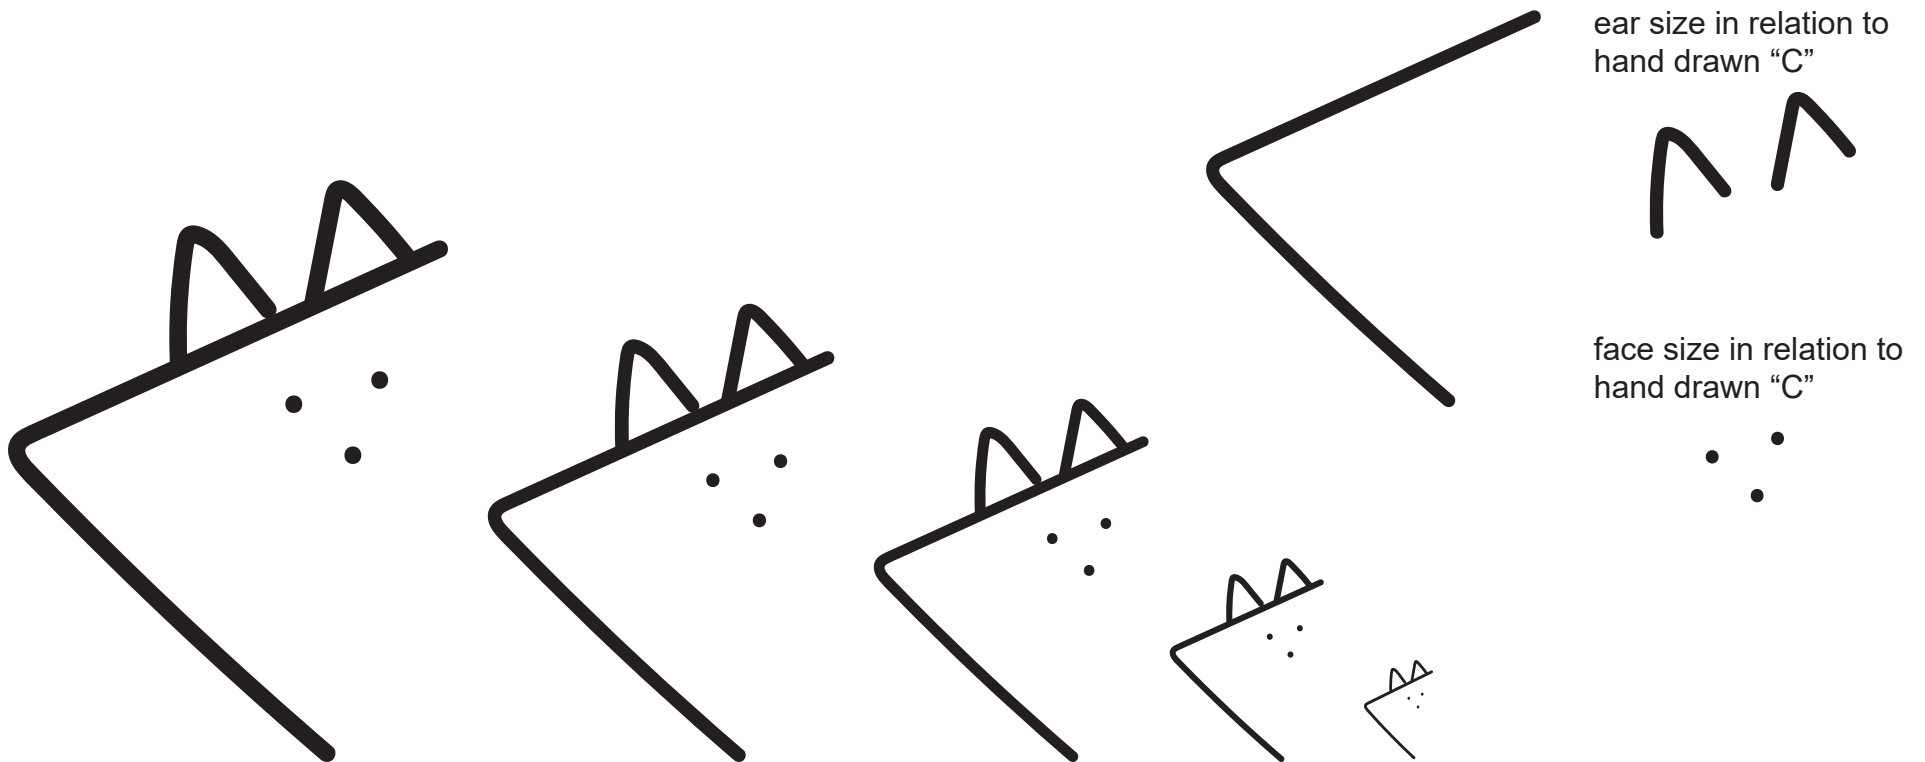

The standard font size for the navigation bar should be set at 15 points. The “reminders” at the left hand side should be set at 11 points.

In the contact page, the user “email, and message,” the font should be bolded and set to 15.5 points.

This is the website’s only font. For any outside website work, such as this Style Guide, “Arial” is allowed for easier legibility.

Logo Treatment

Chat Cats logo is hand drawn in Illustrator. Although it is simple, consistency is crucial. The logo is done with the black paint brush tool. The cat's ears and facial features shouldn't be bigger than the hand drawn letter "C". The idea is that the logo can be distinguishable in larger or smaller scales.

Spacing

Chat Cats overall design is meant to be easy to navigate and minimal. There are **two** colors the website will use the most: orange as the accent color and black for the font color.

The website utilizes the white background to make it easier to read while the orange offers minimal pops of color to each page.

In terms of letting, if the font type is set to 11 points, the letting should be set to 13 points. It should be no more than 2 points sizes higher than the original font size.

Site Elements

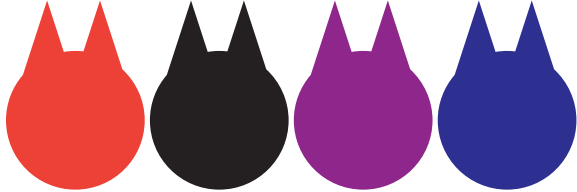

Chat Cats header with the logo should be visible on all pages the user can access. It should consist of the website's "logo, about us, contact us, create a profile and search" bar.

The homepage should have the most cat themed content at first. However to not overwhelm the user, a brief welcome message is present to the left followed by a brief overview of what the community is sharing.

From there, the user can choose to view their profile, view others profiles or create a profile.

Site Assets

Chat Cats overall has a minimal design. Icons are used only when the user wants to create a new profile, or change their existing icon photo.

Our website using four main colors. Color blue should only be used when the user is meant to click onto something; for example a “View more” tab.
